ABOUT US

Bafco Invest LLC became a resident of the Aghdam Industrial Park in early 2023. Located on a 2.5-hectare site within the industrial park, the factory specializes in the production of protective work footwear with reinforced toe caps and durable soles, as well as polyurethane boots designed for various industries.

Our production process and quality control are carried out with the participation of both local and international experts, ensuring that our products meet the highest standards of durability, safety, and reliability. The factory is equipped with state-of-the-art DESMA 622/24 and DESMA B512/12 machines from the German brand DESMA, ensuring precision manufacturing.

Our protective footwear is designed for workers in construction, railways, manufacturing, and agriculture, providing superior resistance to abrasion, punctures, impact, bacteria, fuel, oil, and water. The upper part of our work shoes is made from water-resistant natural leather, keeping feet dry and comfortable for extended periods.

For sole production, we use high-quality polyurethane (PU) and thermoplastic polyurethane (TPU) from BASF, Germany. These materials are known for their exceptional durability, shock absorption, and long-term wear resistance.
